

# Transport Safety

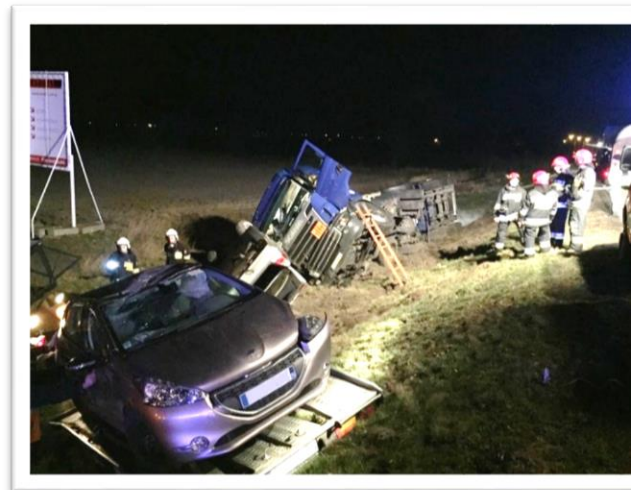

## Winter Seminar 2018

Wednesday 24<sup>th</sup> – Thursday 25<sup>th</sup> January 2018

Le Plaza Theatre, Brussels, Belgium

**Preliminary  
Seminar  
Programme**

**European Industrial Gases Association AISBL**

## Transport Safety

Transportation of gases and equipment by road can often be the highest risk activity for gas companies and their providers of transport services. Complying with legislative and regulatory requirements of operating a transport fleet needs to be supplemented with actions specific for the industrial and medical gases industry to prevent one of our drivers or vehicles from being involved in a serious incident.

It is critical that gas companies and transportation companies have processes in place to reduce the risk of serious vehicle incidents.

Vehicle incident investigations have shown that the majority of these incidents are avoidable and that the causes include:

- A lack of training or knowledge
- People's ability to react to high risk situations
- Human behaviour
- Inadequate organisation and management processes

## Objectives

In our Seminar, industry and external experts will address these causes and will provide guidance and examples of good practices in a range of areas including:

- Driver training
- Risks on the road
- Using technology
- Behaviours and distractions
- Contractor management
- Incident management

Through the Seminar, we intend to provide guidance and perspective on these aspects of transport safety and on how people should be communicating and managing these issues. We will also be presenting proven tools and techniques which managers and employees will be motivated to take back to their companies and implement with conviction.

The Seminar will feature presentations from over twenty global industry and external speakers.

The presentations will be complemented by a poster session which will give the audience the opportunity to learn more concerning specific topics related to transport safety in a different format.

## Who should attend?

Transport and distribution management personnel, senior leaders, functional specialists and engineers from the bulk, cylinder and homecare sectors, representing gas companies and contractors. Experts and those new to the industry.

Regulatory and government officers. Representatives of industrial gas associations, equipment manufacturers and suppliers, consultants, competent authorities, customers and business partners.

***EIGA Seminars always act as an important forum for the exchange of knowledge between EIGA members and industry stakeholders such that best practices in safety and the environment can be widely implemented.***

## Preliminary Programme \*

### Wednesday 24<sup>th</sup> January 2018

<b>Session 1</b>	
Industry Overview and Challenges	EIGA
EIGA Statistics – Why are we here?	Praxair
Transforming Leadership Commitment	Linde Group
Distraction	<i>To be confirmed</i>
<b>Session 2</b>	
Induction and Refresher Training of Drivers	CVA Logistics
Rollover Training and Prevention	Linde Group
Rollover Recovery Training	Industriegaseverband (IGV)
Incident Investigation in Transport Operations	Linde Group
<b>Session 3</b>	
Driving Safety – Our Journey to Zero	
Data Management	Praxair
Vehicle Safety Systems – Truck of the Future	Bosch
<b>Session 4</b>	
Poster Session	

### Thursday 25<sup>th</sup> January 2018

<b>Session 5</b>	
Road Accident Prevention – How to Deal with Behaviours	SAMAT
Slow Speed Manoeuvring in Transport	Linde Group
Carrier Relationship Management	Air Liquide
Driver Performance – Recognition and Motivation	Hoyer
Haulier SSHE Excellence	Exxon Mobil
<b>Session 6:</b>	
Driver Fatigue Management	Air Liquide
Sleepiness and Road Accidents	<i>Medical Expert</i>
Managing Risks on the Road: Security	Air Products
Risk Analysis between Insurance Group and Healthcare Global Operations	Air Liquide
<b>Session 7:</b>	
Maintenance for Safe Transport	Air Liquide
Sustainability in Transport	Air Products
Transport Safety Benefits	Schenk Papendrecht BV

\* Presentations are preliminary and may be subject to change

## **Practical Information**

Full registration package will be available on [www.eiga.eu](http://www.eiga.eu) in October 2017

For information relating to arrangements for the Seminar, please contact us at:
